THE FAN FLYER

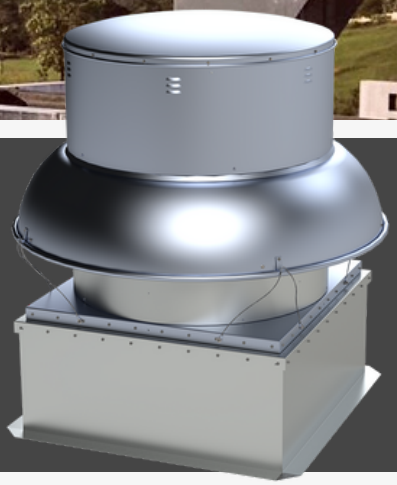
FEBURARY 25, 2021

S&P USA

ADVANCING VENTILATION

ON SHELVES NOW

- Model STXB-HT, Belt Drive Centrifugal Upblast Roof Exhauster for High Temperatures, utilizes an aluminum wheel to create a cost-effective fan that is 500˚F cULus 793 rated.
- Select S-Series (Centrifugal Roof Fans) models are now hurricane and high wind certified for wind-borne debris impact resistance and wind load design pressures up to ±150 PSF.



EXPORT DEPARTMENT

- The S&P USA Export Department exports to more than 50 countries worldwide, including the Turks & Caicos, Costa Rica, Peru, Dominica, India, and Jamaica.
- Our knowledgeable staff and technical experts will guide your team with the management of your next ventilation project.

IMPORTANT PRICING UPDATE

- Effective April 19, 2021, S&P USA will be implementing a 2.5% Price Increase for all goods excluding TR (ERV) products. Our TR (ERV) products will have a 2% price increase applied. Download an updated price list, here.

QUICK UPDATES

- February's Price Book is now available on Optisizer.com and includes lower prices on PRF Radon Mitigation Fans and the addition of PCD110XP.
- Our blog has a new look!
- As employees return to the workplace, understand how proper ventilation can protect occupants of buildings from COVID-19. Learn more in our brochure.

WELCOME, COREY!

It is with great pleasure that we welcome Corey Coffman to the S&P USA team as the Director of Quality and Special Operations. We are excited to have Corey's expertise at S&P USA and look forward to growth and innovation in 2021.
