

# TRLPe

## TOTAL RECOVERY LOW PROFILE

Balanced Energy Ventilation for Residential and Commercial Buildings

With a growing demand for smaller and more flexible units, we are now including the Total Recovery Low Profile (TRLPe) to our Total Recovery series. The TRLPe is a cETLus and HVI certified compact model designed to fit tight spaces. Featuring an energy recovery core with a MERV 8 filter, the TRLPe is the perfect ERV for multi-family homes and residences with low ceilings.

### PRODUCT FEATURES

- HVI and cETLus Certified
- Unit can be mounted in any orientation
- High-efficiency core operates dry in all conditions - no condensate drain pans
- Indoor Air Quality is increased by removing stale indoor air and replacing with fresh, filtered air from the outside

The Ecovatt® standard is used to classify energy-efficient products that use Electronically Commutated (EC) or Direct Current (DC) motors that have certified performance from AMCA or HVI.
