

## HAPPY NATIONAL SAFETY MONTH!

**JUNE 2023** 

At S&P USA, safety is our #1 priority. In honor of National Safety Month, we want to share some safety initiatives we've implemented at our headquarters.

Most safety initiatives begin at our month safety committee meetings. During these meetings we share safety wins, identify concerns, and collaborate on solutions. Meetings are led by a different committee member monthly to teach leadership skills and encourage open discussion.

As a result of our team's collaboration, we've established new Personal Protective Equipment (PPE) guidelines, upgraded equipment that was not up to our safety standards, organized our workspace to reduce hazards, and much more.

These initiatives not only keep our team safe, but ensure that our team can work productively and without disruption from incidents.

## HURRICANE PREPAREDNESS

As we head into the summer, it's time to talk about hurricane preparedness!

Did you know that S&P USA offers optional Tie-Down Kits for our Centrifugal Roof Exhaust Fans? By adding this kit, your fan carries Miami-Dade NOA and Florida Product Approval and is listed with the Texas Department of Insurance under Product Evaluation RV-126 for wind load and wind borne debris resistance per IRC/IBC 2018.

Whatever the weather, your fan will be ready!

## **INDEPENDENCE DAY**

THE FAN FLYER

In observance of Independence Day, S&P USA's phone lines will close at 2:00 PM EDT on Monday, July 3, and reopen for regular business hours on Wednesday, July 5. Our manufacturing plant will continue regular operation.
